

Genetwister is an innovative Dutch biotechnology company founded in 1998 specialized in molecular breeding and bioinformatics of agricultural, horticultural and ornamental plants. Through our research projects we help our customers improve crop quality to enable more sustainable farming and a more reliable food supply for the future. Our shareholders are five internationally renowned vegetable and ornamental breeding companies we are proud to serve.

In view of further growth of the company, Genetwister has a vacancy for a

System Administrator/DevOps

to join our team in Wageningen, The Netherlands.

YOUR POSITION

The System Administrator carries out tasks related to the installation, maintenance and support of Genetwister's Information Technology (IT) infrastructure and equipment used in the research- and office environment. These tasks include installation of hardware and software, troubleshooting technical problems, contributing to data safety, performing back-up operations and providing user support. You will work closely with and report to our experienced System Administrator. You will also work closely with the Bioinformatics & Software Development team that performs research activities by applying cutting-edge technologies to analyze and visualize complex and large bioinformatics data. There you will support Software Developers with development, maintenance, and monitoring of Genetwister's microservice infrastructure.

YOUR PROFILE

- Bachelor in Information Technology, or similar
- Experience (2+ years) programming with an object-oriented language (preferably Java)
- Experience with container orchestration, microservices architecture and CI/CD tools
- Knowledge about Linux, Microsoft or other network-related fields
- Self-starter who is eager to learn and gain work experience in a company with internationals
- Hands-on mentality
- Pragmatic, flexible and pro-active
- Comfortable speaking English
- Experience with or understanding of distributed computing is desirable
- Capable of analysing and resolving complex technical challenges
- A team player who likes to work in a cross-disciplinary team

Genetwister offers you a challenging job in a commercial research environment with professionals who are passionate about innovation and application. The position is based at our offices in Wageningen and is not a remote position. You have the ability to work partially from home in accordance with our working-from-home policy.

Please send your CV and brief motivation letter to Tina Graafmans, Senior Office Manager at info@genetwister.nl. In case you have questions about this vacancy you can contact Herrit van Houten, System Administrator, at h.vanhouten@genetwister.nl.
